

Saud Alanazi

Penetration Tester | Red Team Operator

linkedin.com/in/0xSaud | 0xsaud.github.io

PROFESSIONAL SUMMARY

Cybersecurity student pursuing a Bachelor's degree at the University of Hafr Al-Batin, with hands-on offensive security training as a Red Team Specialist at Haierly. Focused on red team operations and penetration testing, including Active Directory attacks, command-and-control (C2) operations and web application security. Brings a methodical, detail-oriented approach to finding vulnerabilities and communicates findings clearly so teams can fix what matters most.

EDUCATION

Bachelor's Degree in Cybersecurity

University of Hafr Al-Batin | 2023 - 2027

EXPERIENCE

Red Team Specialist (Trainee)

Haierly

- Trained in red team operations, including adversary simulation, C2 operations, lateral movement and Active Directory attacks.
- Practiced planning and executing engagements and documenting findings in professional reports.

Bug Bounty Hunter

Independent

- Test production web applications for business logic flaws, injection vulnerabilities and broken access control.
- Write clear, reproducible vulnerability reports and coordinate fixes through responsible disclosure.

CERTIFICATIONS

- **CRT0** - Certified Red Team Operator, Zero-Point Security
- **C RTP** - Certified Red Team Professional, Altered Security
- **eWPTXv3** - Web Application Penetration Tester eXtreme, INE Security
- **eCPPTv2** - Certified Professional Penetration Tester, INE Security
- **eMAPT** - Mobile Application Penetration Tester, INE Security
- **eJPTv2** - Junior Penetration Tester, INE Security
- **Hack The Box Pro Labs** - Offshore, Zephyr, Dante (Active Directory and enterprise network red team labs)

TECHNICAL SKILLS

- **Red Teaming:** Cobalt Strike, C2 operations, initial access, OPSEC, lateral movement, persistence, defense evasion
- **Active Directory:** Kerberoasting, AS-REP roasting, delegation abuse, ACL abuse, domain and forest trust attacks, BloodHound, Rubeus, Mimikatz
- **Web Application Security:** OWASP Top 10, business logic testing, IDOR and access control, SQLi, XSS, SSRF, SSTI, authentication flaws, API testing, Burp Suite
- **Network Penetration Testing:** Enumeration, exploitation, Linux and Windows privilege escalation, pivoting and tunneling, Nmap, Metasploit
- **Mobile Application Security:** Android and iOS testing, static and dynamic analysis, traffic interception
- **Reporting:** Risk-rated findings, proof of concept development, remediation guidance

SOFT SKILLS

- **Communication:** Explaining technical risk clearly to technical and non-technical audiences, in writing and in person
- **Problem Solving:** Analytical thinking, creativity and attention to detail
- **Teamwork:** Collaborating with development and security teams; working independently under deadlines
- **Professionalism:** Integrity with sensitive information, continuous learning and adaptability
